Who We Are

Konsut Limited is a forward-thinking IT&T solar energy solutions provider. Certified and regulated by the Communications Authority of Kenya, we pride ourselves on delivering dependable, innovative, and sustainable services that empower businesses and communities across the region. Our integrated solutions in two-way communication and renewable energy ensure seamless connectivity and uninterrupted power even in the most remote locations.

Vision & Mission

Vision

To be the most trusted and dependable provider of communication, security, and power solutions across East Africa.

Mission

To deliver tailored, high-quality engineering and technical services that empower our clients through reliability, innovation, and integrity.

Core Values

-  **Honesty & Transparency:** We believe in being open, direct, and ethical in all our dealings.
-  **Commitment to Resolution:** We stay on the ground until your issue is fully resolved.
-  **Professionalism:** We uphold the highest standards in execution, reporting, and support.
-  **Teamwork:** We collaborate within and beyond our team to deliver results that matter.
-  **Reliability:** We deliver what we promise, and our track record proves it.

Our Services

1. Two-Way Communication Systems

We specialize in the design, installation, and maintenance of VHF/UHF and digital radio systems used in mission-critical operations across various industries.

Our offerings include:

- Installation and configuration of Motorola, Hytera, and other leading radio systems
- Base stations, repeaters (e.g., SLR5500), antennas, and power systems
- Supply and programming of handheld and mobile radios
- Solar-powered radio systems for off-grid reliability

Push-to-Talk Over Cellular (PoC):

We also deploy PoC systems that utilize existing 3G/4G/5G networks to provide radio-like functionality over mobile phones. Ideal for wide-area coverage without the infrastructure of repeaters.

Supported PoC platforms include:

- Motorola WAVE PTX
- Zello Enterprise
- PTT4U
- iPTT

Our Services

2. Secure Network Infrastructure

We design and implement secure wired and wireless networks for communication systems and IT environments. This includes but not limited to:

- Firewall and access control implementation
- VPNs and encryption protocols
- System integration and remote access control

3. CCTV Surveillance Systems

End-to-end CCTV and surveillance solutions for security monitoring and deterrence, including:

- IP and analog systems
- PTZ and fixed cameras
- Remote viewing via mobile and desktop apps
- Motion detection, analytics, and alerts

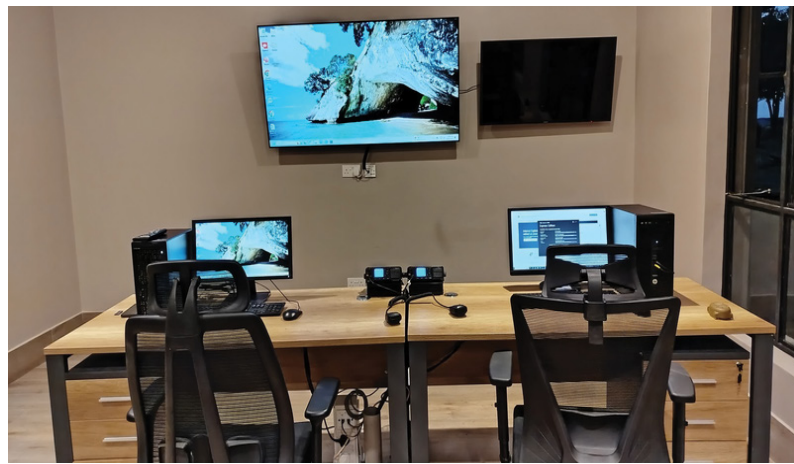

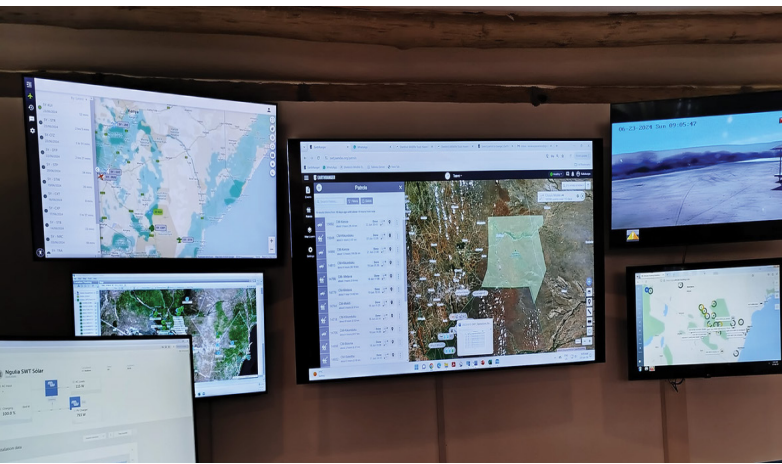

Our Services

4. Control Room Setups & Dispatch Software

We provide turnkey control room setups tailored to client operations in security, emergency response, fleet, and conservation. Capabilities include:

- GPS tracking and AVL
- Voice dispatch and live communication
- Event and alarm monitoring
- Call and event recording
- Job ticketing and reporting
- Emergency alerts and system telemetry

Supported Platforms:

- TRBOnet (for Motorola MOTOTRBO): Advanced dispatch console with full telemetry, call recording, job ticketing, and tracking.
- Hytera SmartDispatch: Offers GPS tracking, text, voice, and emergency management for Hytera DMR systems.
- Motorola WAVE PTX Dispatch Console: Cloud-based solution for managing PoC devices with browser access.

5. Solar Power Systems

We design, supply, and maintain solar power systems for homes, institutions, and off-grid telecom installations. Services include:

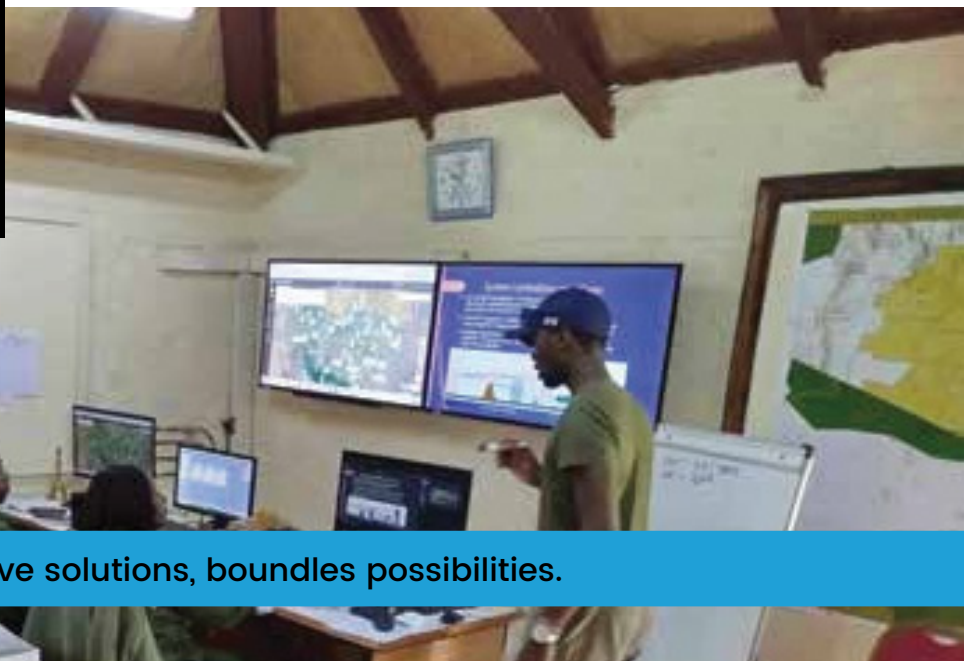

- System sizing and engineering
- Battery backup and hybrid integration
- Installation and commissioning
- Monitoring and after-sales support

6. Technical Training & Support

We provide hands-on training and capacity-building for:

- Radio communication systems
- Solar system deployment
- CCTV and control room operations
- Preventive maintenance protocols

7. Site Surveys & System Assessments

Before any deployment or upgrade, our team conducts thorough surveys and system assays, including:

- Signal mapping and coverage reports
- Power audits
- Risk assessments
- Upgrade recommendations

8. Equipment & Accessories Supply

We stock and supply quality accessories and systems such as:

- Handheld and mobile radios
- Antennas, mounts, and connectors
- Power supplies and batteries
- CCTV components and cabling
- Solar panels, inverters, and charge controllers

Our Team

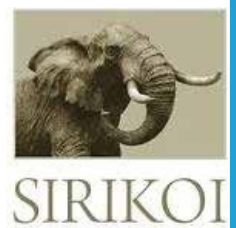

Konsut Limited is powered by a multidisciplinary team including:

- Technical Directors
- Certified Engineers
- Experienced Radio Technicians
- Solar and Power Specialists
- Operations Manager
- Administrative Support

Together, we bring a blend of field-tested expertise, agility and innovation that ensures project success from start to finish.

Key Clients

The logo for Konsüt, featuring a stylized 'K' in blue and black, followed by the word 'onsüt' in blue. The background of the entire page is a photograph of a solar-powered telecommunications tower in a dry, hilly landscape under a clear blue sky. The tower is a tall metal lattice structure with a white parabolic antenna. To its right, several large solar panels are mounted on a tilted frame. A grey electrical cabinet is visible at the base of the tower. A large blue curved graphic element separates the top image from the bottom text area.
